Overview

This bill requires the commissioner of health to assess and report on the quality of care provided in the state for ST elevation myocardial infarction response.

Section

- 1** **ST elevation myocardial infarction.** Adds section § 144.497. Requires the commissioner of health to assess and report on the quality of care provided in the state for ST elevation myocardial infarction response. The commissioner is required to:
- (1) utilize and analyze data provided by receiving centers to the ACTION Registry-Get with guidelines that do not identify individuals;
 - (2) post quarterly summary reports of data on the Department of Health Web site;
 - (3) annually inform the appropriate legislative committees of progress toward improving the quality of care and patient outcomes; and
 - (4) coordinate with national voluntary health organizations involved in quality improvement in ST elevation myocardial infarction heart attacks to encourage receiving centers to report data consistent with nationally recognized guidelines on treatment and encourage sharing of information among health care providers on ways to improve the quality of care to patients in Minnesota.
